arsenal

The free Minecraft PvP mod

Free | Fabric | Minecraft 1.20 to 26.3 | Client-side

Arsenal is a free PvP mod for Minecraft that puts every HUD, helper and tweak a PvP player wants into one menu behind Right Shift.

It is a client-side Fabric mod made by one person, SoloHandCoder. More than 150 features sit in one clean menu, each with its own switch and settings. On top come cosmetics you earn by playing, a Fight Summary after every fight, leaderboards and achievements, and a free launcher that installs everything in one click, saves clips with F8 and has friends and chat built in.

HEADLINE FEATURES

One menu, 150+ features
Right Shift opens one menu with 152 features in ten tabs, with search, favourites, profiles and a key for anything.

PvP HUDs
Armor, Target HUD, potion timers, cooldowns, keystrokes, combo and reach. Drag them anywhere, restyle them with 20 HUD themes.

Fight Summary
After every fight: hits, accuracy, damage dealt and taken, best combo and totem pops.

Cosmetics
Animated capes, hats, wings, pets, blades and kill effects that other Arsenal players see too.

Credits earned by playing
1 credit a minute on any server or world, 5 per kill on leaderboard servers, plus quests and a daily streak.

Leaderboards and achievements
Kills, K/D, wins and playtime on approved PvP servers. Achievements unlock their own cosmetics.

Arsenal Launcher
Free, for Windows. Pick any version from 1.20 to 26.3 and press Play: Minecraft, Fabric and Arsenal are set up for you.

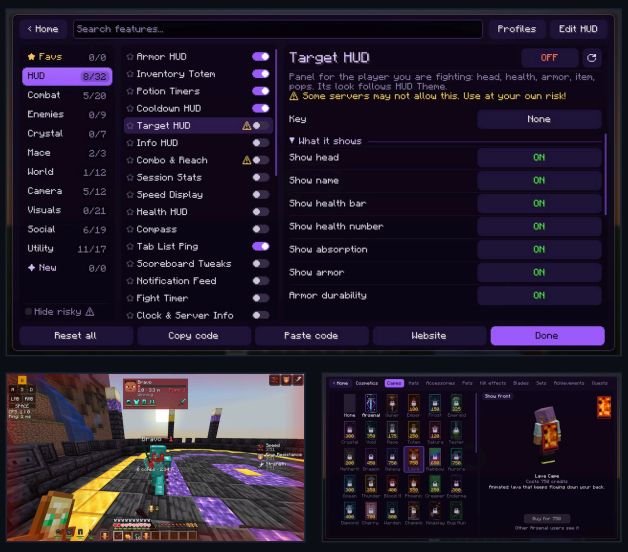

Clips
Press F8 to save the last 15 seconds to 2 minutes. Auto clips for kill streaks, clutches and totem saves, with markers.

Friends and chat
See who is online, join their server in one click and message them in the launcher.

Practice Bot server
A server template with bots for Crystal, Sword, Mace, Axe & Shield and Pot PvP, on your own PC.

Creator programme
Your own creator code, a Creator badge and creator cosmetics. Viewers who enter a code get 250 credits.

WHAT IT LOOKS LIKE
